

Technology Stack

Team ID: SWTID-2026-4623

Team Size:5

Project Name: Import Data using Transform Maps (Spreadsheet)

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	ServiceNow Web Interface	Provides the user interface for uploading spreadsheets, configuring Import Sets and Transform Maps, viewing employee records, reports, and dashboards.
2	Backend / Server-Side	ServiceNow Platform	Handles data import, transformation, field mapping, Coalesce processing, record insertion and updates.
3	Database / Data Storage	ServiceNow Database	Stores Import Set data, Employee Test records, transformed employee information, and related system data.
4	Cloud / Hosting / Deployment	ServiceNow Cloud Platform	Provides the hosted environment required to run the ServiceNow application and manage the employee data import solution.
5	Version Control & CI/CD	ServiceNow Update Sets	Helps capture and move configuration changes such as tables, fields, Transform Maps, reports, and dashboards between ServiceNow instances.
6	Third-Party APIs / Other Tools	Microsoft Excel / Google Sheets	Used to prepare and maintain structured employee data before uploading it into ServiceNow through the Import Set process.

ServiceNow Import Set

Transform Map & Coalesce

ServiceNow Database / Employee Test Table

Reports & Employee Analytics Dashboard

The project specifically uses an external spreadsheet as the source, loads the data into an Import Set table, and transforms it into the target Employee Test table using a Transform Map.
