

Code-Layout, Readability and Reusability

Team ID: SWTID-2026-4623

Team Size:5

Project Name: Import Data using Transform Maps (Spreadsheet)

Code Layout Checklist

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	ServiceNow configuration and mapping definitions are maintained consistently.
2	Proper File Structure	Files and folders are logically organized	Yes	Project data, Import Sets, Transform Maps, Reports, and Dashboard components are organized according to their purpose.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Fields such as Employee ID, Employee Name, Email, Department, and Location clearly represent their data.
4	Function / Method Names	Functions are descriptively named	Yes	Configuration names such as Employee Import and Sample Spreadsheet Import clearly identify their purpose.
5	Code Comments	Inline and block comments explain logic	Partial	The project mainly uses ServiceNow configuration rather than custom code; clear names and documentation explain the transformation logic.
6	Modular Design	Code is split into reusable functions/modules	Yes	Import Set, Transform Map, Coalesce, Reports, and Dashboard are separated into reusable configuration components.

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
7	No Redundant Code	Duplicate or unused code is removed	Yes	The solution avoids unnecessary custom code and uses ServiceNow's built-in import and transformation features.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Transform History and import results are checked to identify successful, inserted, updated, and ignored records.

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Employee Import	ServiceNow Import Set	Used whenever employee spreadsheet data is uploaded	High
2	Sample Spreadsheet Import	ServiceNow Transform Map	Reused for transforming employee spreadsheet data	High
3	Employee ID Coalesce	ServiceNow Transform Map	Used to identify and update existing employee records	High
4	Employee Reports	ServiceNow Reports	Used for department, location, and employee analysis	Medium
5	Employee Analytics Dashboard	ServiceNow Dashboard	Used for centralized employee data monitoring	Medium

Overall Code Quality Assessment

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Components are organized clearly according to import, transformation, validation, reporting, and dashboard functions.
Readability	5	Field names, Transform Map names, reports, and configuration components are descriptive and easy to understand.
Reusability	5	Import Sets, Transform Maps, Coalesce configuration, reports, and dashboard components can be reused for repeated employee data imports.
Documentation / Comments	4	The project is documented clearly; limited custom-code comments are required because the solution mainly uses ServiceNow configuration.
Overall Score	5 / 5	The solution is well-structured, readable, maintainable, and reusable for repeated employee data import operations.
