

## No. of Functional Features Included in the Solution

Team ID: SWTID-2026-4623

Team Size:5

Project Name: Import Data using Transform Maps (Spreadsheet)

### Functional Features Overview

| S.No | Feature Name                    | Feature Description                                                                       | Module / Component       | Status | Marks | Contribution                                                   |
|------|---------------------------------|-------------------------------------------------------------------------------------------|--------------------------|--------|-------|----------------------------------------------------------------|
| 1    | Spreadsheet Data Preparation    | Prepare structured employee data with Employee ID, Name, Email, Department, and Location. | Excel / Google Sheets    | Done   | 1     | Provides structured source data for import.                    |
| 2    | Import Set                      | Upload spreadsheet data and store it in the Employee Import staging table.                | ServiceNow Import Set    | Done   | 1     | Provides controlled staging of external data.                  |
| 3    | Transform Map                   | Map spreadsheet fields to corresponding Employee Test table fields.                       | Transform Map            | Done   | 1     | Converts source data into the required target format.          |
| 4    | Coalesce / Duplicate Prevention | Use Employee ID as Coalesce to identify existing employee records.                        | Transform Map / Coalesce | Done   | 1     | Prevents duplicate employee records and updates existing data. |
| 5    | Insert & Update Records         | Insert new employees and update existing employee records during transformation.          | Employee Test Table      | Done   | 1     | Maintains accurate and current employee information.           |

| S.No | Feature Name                 | Feature Description                                                     | Module / Component   | Status | Marks | Contribution                                             |
|------|------------------------------|-------------------------------------------------------------------------|----------------------|--------|-------|----------------------------------------------------------|
| 6    | Import Validation            | Check Transform History for inserted, updated, and ignored records.     | Transform History    | Done   | 1     | Helps verify successful data processing.                 |
| 7    | Employee Reports             | Generate reports based on department, location, and employee details.   | ServiceNow Reports   | Done   | 1     | Provides employee data analysis and monitoring.          |
| 8    | Employee Analytics Dashboard | Display employee reports and import results in a centralized dashboard. | ServiceNow Dashboard | Done   | 1     | Provides centralized visibility of employee information. |

### Feature Summary

| Metric                             | Count / Value |
|------------------------------------|---------------|
| Total Features Planned             | 8             |
| Total Features Implemented         | 8             |
| Core / Must-Have Features          | 6             |
| Additional / Nice-to-Have Features | 2             |
| Features Tested & Verified         | 8             |

### Feature Category Breakdown

| S.No | Category            | Features in Category | Example Features                                              |
|------|---------------------|----------------------|---------------------------------------------------------------|
| 1    | User Interface (UI) | 2                    | ServiceNow Web Interface, Employee Analytics Dashboard        |
| 2    | Backend / Logic     | 4                    | Import Set, Transform Map, Coalesce, Insert/Update Processing |

| <b>S.No</b> | <b>Category</b>           | <b>Features in Category</b> | <b>Example Features</b>                              |
|-------------|---------------------------|-----------------------------|------------------------------------------------------|
| 3           | Database / Storage        | 1                           | Employee Import and Employee Test Tables             |
| 4           | API / Integration         | 1                           | Excel / Google Sheets data import into ServiceNow    |
| 5           | Security / Authentication | 1                           | ServiceNow user authentication and role-based access |

### **Overall Functional Feature Coverage**

**8 out of 8 planned features are implemented and verified.**

### **Main Flow:**

**Spreadsheet → Import Set → Transform Map → Coalesce → Employee Test → Validation → Reports → Dashboard**
